

Our RoadMap

Q4 2020

Pre-development: Engineered GBITS infrastructure and funded internally and the balance to treasury, along with other fundamental design and construction.

Development began in November 2020.

Q1 2021

Implemented BEP20 protocols and in-house interfaces to allow for trading, voting and the development of value partners including the potential acquisition of other Altcoins and Governance Units.

Implemented Treasury and Backbone systems

Q2 2021

Mergers begin with Knightsbridge, HOPE, BUDCOIN and the scale of the exercise explodes.

Q3 2021

Tentative full public launch time frame for GBIT Synthetic Assets. GBIT Synthetic Assets will allow a variety of synthetic cryptocurrencies, stablecoins, and other assets such as gold and silver that are in demand to be traded.

Q4 2021

Tentative full public launch time frame for GBIT Synthetic Assets on our Inhouse Exchange.
